Official MCP Servers

View all official servers →

Firecrawl

Empowers LLMs with advanced web scraping capabilities for content extraction, crawling, and search functionalities.

WEB SCRAPING & DATA COLLECTION

★ 4.2k

ElevenLabs

Enables interaction with Text to Speech and audio processing APIs for MCP clients.

API DEVELOPMENT

★ 1.4k

Magic

Generate modern UI components instantly from natural language descriptions within your IDE.

DEVELOPER TOOLS

☆ 5.2k

 **Browserbase** ↗

Enables LLMs to control cloud browsers for web interaction, data extraction, and task automation using Browserbase and Stagehand.

BROWSER AUTOMATION

☆ 3.4k

 **Exa** ↗

Enables AI assistants like Claude to perform web searches using the Exa AI Search API.

API DEVELOPMENT

☆ 4.6k

 **Tavily** ↗

Integrates Tavily's search and data extraction capabilities with AI assistants via the Model Context Protocol.

WEB SCRAPING & DATA COLLECTION

☆ 2.1k

Featured MCP Servers

View all featured servers →

 **Godot** ↗

Enables AI assistants to interact with the Godot game engine by launching the editor, running projects, and capturing debug output.

☆ 4.4k

 **Excel** ↗

Enables Excel file manipulation capabilities without requiring Microsoft Excel installation.

☆ 4.0k

 **Unity**

Enables communication between Unity and Large Language Models for automating workflows and controlling the Unity Editor.

☆ 2.6k

 **FastAPI**

Exposes FastAPI endpoints as Model Context Protocol (MCP) tools with zero configuration.

☆ 12k

 **Ghidra**

Enables Large Language Models (LLMs) to autonomously reverse engineer applications by exposing Ghidra's core functionality through an Model Context Protocol (MCP) server.

☆ 9.3k

 **Task Master**

Streamline AI-driven development workflows by automating task management with Claude.

☆ 28k

Top MCP Servers

View leaderboard →

 **Superpowers**

Empowers AI coding agents with a comprehensive and structured software development workflow, from design refinement to TDD-driven implementation.

DEVELOPER TOOLS

★ 237k

**Ruflo**

Orchestrates intelligent multi-agent swarms for Claude, coordinating autonomous workflows and building conversational AI systems.

DEVELOPER TOOLS

★ 61k

**TrendRadar**

Aggregates trending topics from over 35 platforms, offering intelligent filtering, automated multi-channel notifications, and AI-powered conversational analysis for deep news insights.

ANALYTICS & MONITORING

★ 60k

**Context7**

Fetches up-to-date documentation and code examples for LLMs and AI code editors directly from the source.

LEARNING & DOCUMENTATION

★ 58k

**OpenSpec**

Facilitates spec-driven development to ensure alignment between humans and AI coding assistants before any code is written.

DEVELOPER TOOLS

★ 56k

**Penpot**

Empower teams with an open-source design and prototyping platform that bridges the gap between design and code through real-time collaboration.

DESIGN TOOLS

★ 53k

Latest MCP Servers

BROWSER AUTOMATION

0

 **Media Context** ↗

Analyze video, audio, and images locally to extract frames, transcribe speech, and perform OCR, providing AI assistants with rich multimodal context without cloud dependencies.

DATA SCIENCE & ML

0

MCP Clients

View all clients →

 **Zed** ↗

Edit code with high performance and multiplayer collaboration.

DEVELOPER TOOLS

★ 86k

 **Cline** ↗

Automates coding tasks directly within your IDE using AI, capable of creating/editing files, executing commands, and using the browser with user permission.

DEVELOPER TOOLS

★ 64k

 **Cherry Studio** ↗

Enables users to interact with multiple large language model (LLM) providers through a single desktop client.

DEVELOPER TOOLS

★ 48k

 **LibreChat** ↗

Self-host a privacy-first, versatile ChatGPT alternative supporting multiple AI models and advanced features.

OTHER

★ 40k

Goose

Automates complex development tasks using an extensible, open-source AI agent.

API DEVELOPMENT

★ 37k

5ire

A cross-platform AI assistant and Model Context Protocol (MCP) client that connects to various services and local knowledge bases.

DEVELOPER TOOLS

★ 5.3k

Top Agent Skills

WHAT ARE AGENT SKILLS?

View all skills →

GH Issues Auto-Fixer

Automates the end-to-end GitHub issue lifecycle by spawning sub-agents to implement code fixes, open pull requests, and resolve review comments.

COLLABORATION TOOLS

★ 330k

Discord Integration

Manages Discord operations including messaging, reactions, and channel management directly through Claude.

COLLABORATION TOOLS

★ 313k

React Code Fix & Linter

Automates code formatting and linting checks to ensure code quality and CI compliance before committing.

GitHub Integration

Manages GitHub pull requests, issues, and CI/CD workflows directly through the command line using the GitHub CLI.

COLLABORATION TOOLS

☆ 229k

ordercli Food Delivery Manager

Manages and tracks Foodora delivery orders directly from the terminal with real-time status updates.

E-COMMERCE SOLUTIONS

☆ 229k

Google Workspace CLI Assistant

Integrates Google Workspace services like Gmail, Calendar, Drive, and Sheets directly into your terminal workflow.

PRODUCTIVITY & WORKFLOW

☆ 229k

Frequently Asked Questions

- What is MCP (Model Context Protocol)?
